

PROGRAMME

Dear Friends,

It is meeting time again! We have enjoyed your company every year for our live surgery workshops and it is no different this time!

We have benefitted immensely from your kind feedback and it has helped us grow in more ways than one.

This time around, we are going to demonstrate a new technique of bone obliteration tympanoplasty which eliminates the need for a large cavity in cholesteatoma. We will also be demonstrating select non otologic surgeries too- identification and preservation of facial nerve in parotid surgery, techniques in CSF rhinorhea closure, Kashima and Endoscopic DCR. The emphasis will be on detail- not a large number of surgeries, and should help the developing otolaryngologist.

Another highlight of the programme will be a lecture on head and neck radiology by one of India's most eminent radiologists - Dr. Sanjay Vaid, Pune.

The venue would be Baby Memorial Hospital, in their high tech new operation theatre suites. So, please be with us on 16th and 17th of July 2011.

With Regards,

Dr. M.P. Manoj
