Dear Friends,

The 2nd MESIARC live surgery workshop is due and this time, we have to exceed your expectations after the enthusiastic response to last year's workshop. We believe that a live surgery workshop should not aim to teach, rather stimulate the viewer to question and experiment the latest and well honed techniques in the field of Otorhinologic surgery. For this year's workshop, we have arranged not only a wide variety of ear surgeries as usual, but in addition a careful selection of nose and throat surgeries, for example, endoscopic DCR, Type I thyroplasty, BOTOX injection for Spasmodic dysphonia and trachea esophageal puncture.

The sophisticated machinery will be there like the Carl Zeiss Vario microscope, the top-of- the line Xomed Xcalibur and Bein Air Osseodoc drills, Storz 3 chip Camera, endoscrubber and endoscopic drills, and Add to this high quality video transmission and the stage is set for a stimulating day of discussions! Welcome to Calicut!
