

The DD should be drawn in favour of  
“**MESIARC**” payable at “**Calicut**”.  
Please add Rs. 40/- for out station  
cheque

### **PROGRAMME**

**24<sup>th</sup> August**

Registration- 9.00 – 9.25

Inauguration – 9.30- 9.45

**(MESIARC)**

&

**INDIAN ASSOCIATION OF PAEDIATRICS**

*invites you for  
the*

## **“Paediatric Otorhinolaryngology Workshop”**

on

**24<sup>th</sup> August 2008**

at

**IMA Hall-Calicut**

*Please send your registration to*

**Dr. Yeshwanth Chakravarthy**  
**Organizing secretary,**  
**MESIARC**  
**5/1414, Saira Arcade,**  
**Waynad Road, East**  
**Nadakkavu,**  
**Calicut- 673 006**

### **SCIENTIFIC SESSION**

**9.50 - 1.30 p.m**

Hearing loss in children

- **Dr. M.P. Manoj**

Otitis media in children

- **Dr. Mohammed Sayeer**

Voice disorders in children

- **Dr. Santhosh Kumar PT**

Pediatric allergy and OSA

- **Dr. Yeshwant Chakravarthy**

Lunch - 1.30 p.m.

Dear friends

Pediatrics and Otolaryngology have been closely interlinked in the last millennium. Pediatric otolaryngology has emerged as a subspecialty by itself in most developed countries and the developments in this field have been nothing short of dramatic. The challenges of a high tech specialty and the demands of a pediatric practice make this marriage exciting and demanding.

Sadly, in India, even if there is a pediatric otolaryngology body, nothing seems to happen significantly to integrate these two interesting branches of medicine. There seems to be no common protocols or integrated therapy modules. In the US, the AAP and AAO-HNS are instrumental in guiding well-researched treatment protocols and it is time we clamor for such a thing here.

MESIARC has been instrumental in arranging so many CME programs that have focused on the need of the day and up to date scientific content, has teamed up with IAP to design this CME program on Pediatric Otolaryngology which is meant to be as interactive as educative.

We plan four different modules for this session, as an initial foray into this very different CME program. They are Hearing loss and intervention in children, pediatric allergy, investigations and optimized treatment, Voice disorders, their evaluation and management in children, and Otitis media and effusion-current concepts, diagnostic methods and treatment.

Each CME module would involve a lecture on the subject, an interactive quiz session, video

presentations and discussions, with ratings on each subject. You would be given a handbook to carry home and we will together, with your support develop an optimized treatment protocol, which hopefully will be polished and refined over time.

Do register early and help us to design the CME with you in mind! Let us work together for better care for our precious little patients! Be with us on the 24<sup>th</sup> of August 2008 at the IMA Hall, Calicut at 9.00 AM sharp. The CME program is designed to run exactly as scheduled.
